SEVEN BRITISH CABINET MINISTERS FOR ECONOMIC CONFERENCE AT OTTAWA

OTTAWA—The coming British Conference at Ottawa promises to have repercussions far beyond the territories immediately concerned. Mr. Ramsey MacDonald's decision to send seven of his leading Cabinet Ministers to attend it indicates that Britain is beginning to be aware of this fact.

The team selected includes an ex-Prime Minister in Mr. Stanley Baldwin, and such experts in finance, economics and international law as Mr. Neville Chamberlain, Mr. Walter Runciman and Lord Pethick-Lewis, besides a host of departmental officers led by the Secretaries of State for Dominion, Colonial and Agricultural Affairs.

The reason for so great a delegation is not far to seek. Not only are there possibilities near and far of establishing a British Empire Customs Union, but it is beginning to be seen that other nations must be affected by any thing of the kind.

The new feature in the situation is that Britain, by adopting protection has put itself for the first time in eighty six years in a position to afford these other countries which reciprocate in kind. The conference is to build up on this, and make such schemes as goods may get through trade barriers now blocking world business.

SUGGESTIONS ON SOIL DRIFTING

Don H. Bark of Hiasano has a very interesting and instructive article in the Irrigation Bulletin upon the important question of Soil Drifting in which he writes that of the fact that soil drifting has become a very serious problem throughout the three Prairie Provinces, there can be no doubt. Much has been said and written about this problem, but on the whole, little has been done locally to cope with it. This problem is not better as to any extent, the first few years after the prairie soil was broken, as there was still fine enough left in the soil to bind the particles together sufficiently to prevent serious blowing. The method of farming now, however, of burning the stubble and straw stacks and adding nothing to the soil containing fine, thin, after year has resulted in the soil face and so devoid of humus and fibre that blowing now takes place over wide areas at the best of seasons, causing wind erosion and losses. It does seem as though farming practices, with different conservation, could be able to cope with this problem and the best remedies in every case, but does feel that some of the suggestions of the following suggestions is well worth considering:

Because the decline in prices generally has given free rein to absurd liberties, we purposely omit comparative prices. We simply state that LEISHMAN clothes have been substantially reduced in price in conformity with all other commodities, but the old inimitable LEISHMAN quality remains unimpaired.

"I will go and tell him. He will be so pleased."
